

Reflections is a biannual magazine produced by Louis Poulsen. Designed to Shape Light is the essence of Louis Poulsen and besides from visualizing this within their product range and image shots, Reflections is a magazine combining product information and editorial content focusing on the end-user. This is the sixth issue and we have been a

part of it since launch – creating the identity, choosing the editorial content and layouting each issue. By combining graphics, images, colours and content Reflections has been well received both internally at Louis Poulsen but also with the end-user and the plan is to keep creating Reflections for many years to come.
