

A dramatic, high-contrast photograph of a gorilla on a wooden cross. The gorilla is positioned centrally, with its arms outstretched along the horizontal beam of the cross. Its body is draped over the vertical post, and its legs are visible at the bottom. The gorilla's face is turned slightly to the left, with a somber expression. The background is a dark, textured wall. The lighting highlights the gorilla's fur and the texture of the cross. A thick chain is visible at the top of the cross.
