

1

Buy the stock and follow your progress

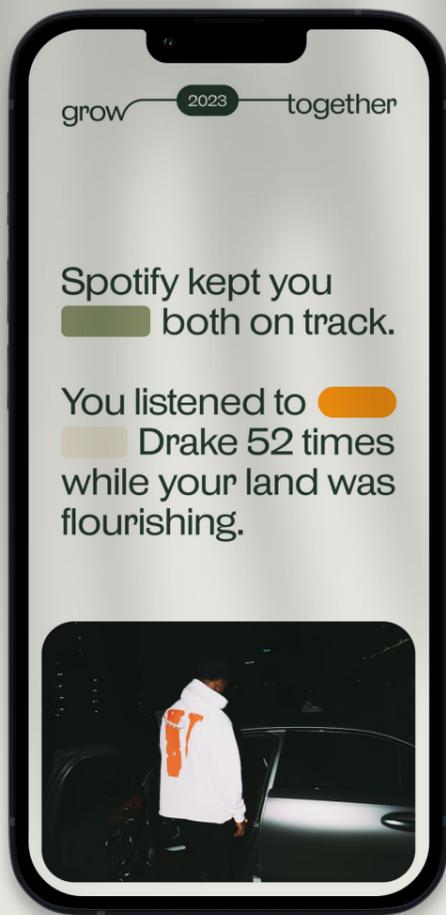

2

Configure your co-ownership profile

3

Check your Grow Together Yearly Review

grow  together

## Concept description:

Grow Together, a sub-brand of Wild Nature Foundation, offers a digital platform to buy and track investments in wild stock. Users can also co-own investments with others and sync their social media profiles for a yearly review of their progress and investment updates. An example of an update would be a tree being planted on land co-owned by the user and their partner.
