

ADHD Certified

"ADHD Certified" empowers people to recognise their ADHD symptoms as a certification of their unique skillset rather than a diagnosis.

— A certification that distinguishes them as exceptional candidates in the professional landscape, showcasing their value as highly desirable employees.

Our visual expression of ADHD Foreningen embodies a positive, bold, and dynamic representation, showcasing the countless qualities that individuals with ADHD possess. Through vibrant colors and playful design elements, we highlight the inherent strengths and talents that define this community.
